

Coloring Pages – Rock Island Virtual Field Trip

Activities designed to deepen learning
while making cross-curriculum connections

Kindergarten

Fact Byte - Invite each child to select their favorite aquatic bird from the video. Color their bird followed by telling one fact about the bird using dictation to teacher, labels, or writing a sentence.

Math - Invite each child to select their favorite aquatic bird from the story. Color and cut out their bird. With the teacher's assistance the children can build a wall graph showing the how many birds were made of each type.

Grade 1

Species Comparison - Invite each student to select two of the bird pictures to color and cut out. Next, the child can glue the two birds on a poster page. Study the two birds, compare them. How are they the same? Write a sentence. How are they different? Write a sentence. Share in small group or make a class presentation.

Math – Do a comparison study learning about the various weights and heights of each bird. Work with a group to create a display to show what your group has learned, noticed.

Grade 2

Build a Habitat – Select one aquatic bird to learn more about. Research your bird, in particular the habitat it needs for successful survival. Post your bird on a large page and add picture details to support the habitat. Consider using a bird printed on cardstock that can be put in a 3-D habitat that you build using various materials. Share your project with a peer then with the class.

Save The River envisions a healthy Upper St. Lawrence River that provides safe drinking water, is home to a thriving range of indigenous species and supports sustainable economic activity.
